

COSHH Risk Assessment

(Control of Substances Hazardous to Health)

Description

This 2-day COSHH course provides delegates with a broad understanding of the COSHH Regulations as well as practical knowledge and skills to be able to manage situations that involve substances potentially hazardous to health.

This course is delivered by experienced health & safety professionals and gives time for in-course practical sessions. Depending on your need, the course content can be tailored to meet your key concerns, alongside specific local requirements.

Aims

Delegates will be able to undertake COSHH risk assessments for work operations involving hazardous substances that will contribute to the management of hazardous substances

Objectives

Delegates will:

- Develop an understanding of the key principles and duties of the COSHH Regulations
- Understand how hazardous substances can cause harm
- Be able to interpret information provided for hazardous substances (safety data sheets, substance labelling, workplace exposure limits (EH40))
- Understand how to complete a suitable and sufficient COSHH Risk assessment
- Be able to make recommendations on the most appropriate prevention and control measures
- Be able to recognise when additional expertise is required

Duration 2 Days

Modules

- Health & Safety in the UK
- Why is COSHH important?
