

# Dynamic Risk Assessment

## Description

This Dynamic Risk Assessment course is created to provide workers and managers, in all sectors, with the practical knowledge, skills, tools and techniques to be able to deal with risks and risk control judgements arising from unpredictable situations. The course is also suitable for safety and other professionals who wish to widen their understanding of undertaking and managing the 'dynamic' risk process.

This course, delivered by experienced health & safety professionals, gives time for in-course practical sessions and an end-of-course action-planning workshop. During the course there is also time to explore your in-house systems and processes.

## Aims

Delegates will improve their confidence in when and how to make dynamic decisions and/or be able to support their team's ability to make dynamic decisions

## Objectives

Delegates will be able to:

- Understand how dynamic decisions are made
- Be able to help improve decision making
- Know how to support dynamic decision making in your peers and your reports

**Duration** 1 or 2 days

## Modules

### Part 1: Dynamic risk

- H&S Law
- What is Dynamic Risk Assessment?
- Making it easy to make the correct decision

### Part 2: Safety Risk Management

- Risk assessment principles
- Task-based risk
- Understanding planned risk assessments
- Risk control
