

# IIRSM General Risk Assessment

## Description

This course teaches delegates how to perform general risk assessments to cover the widest range of safety concerns. This includes: if and when to record assessments; how to identify and prioritise risk; how to keep records to a manageable but important minimum; how to use the general risk assessment process to develop control measures. In summary, how to predict and protect into the future.

This is a practical course – learning through practical sessions and group exercises.

## Aims

To provide those who will be required to write risk assessments with a good working knowledge of the theory and practice of conducting general risk assessments

## Objectives

Delegates will:

- Understand how to carry out task analysis
- Know how to carry out initial assessments
- Learn how to record findings satisfactorily
- Know how to develop risk control solutions
- Understand basic audit trail considerations
- Be able to recognise when specialist help may be required

**Duration** 2 Days

## Modules

- Health & Safety Background
- Health & Safety Law
- Task-based risk
- Principles of risk assessment
- Conducting risk assessments
- Risk control
- Other risk assessments
- The risk management process
