

# IIRSM Risk Management

## Description

This Risk Management course is created to provide line, middle and senior managers, in all sectors, with the practical knowledge, skills, tools and techniques to be able to discharge their health and safety risk management responsibilities effectively.

This course, delivered by experienced Health & Safety professionals, gives time for in-course practical sessions and an end-of-course action-planning workshop. During the course there is also time to explore the in-house systems and processes within organisations, and the option to tailor the course materials to specific local requirements/key concerns.

## Aims

To give delegates a practical understanding of risk management processes so that they can make better health & safety decisions

## Objectives

Delegates will:

- Know how to drive safety in their organisation
- Understand their legal health and safety responsibilities
- Know how to discharge those responsibilities
- Learn how to identify, describe and compare risks
- Know how to manage the control of risks
- Be aware of how and when to report risks

**Duration** 2 Days

## Modules

- The legal, moral and business case for safety risk management
- Core values as a way to drive safe behaviour
- H&S law – key concepts
- Task-based risk
- Evaluating risk
- Risk assessment methodology
- Risk control
- Risk monitoring and review
- Risk communication
