IOSH Managing Safely

Description

The IOSH-accredited Managing Safely course is designed for managers and supervisors to give them a thorough understanding of their responsibilities when it comes to health and safety.

It is a flexible course, taught by our experienced health & safety professionals, which brings managers up to speed on the practical actions they need to take to handle health and safety issues they are responsible for.

Aims

Delegates will have the knowledge, tools and techniques to manage safely, play an active role in their in-house health and safety management processes and systems, and actively contribute to the development of an effective safety culture in their organisation

Objectives

Delegates will:

- Understand the legal moral and business context for modern health & safety management
- Know how to recognise, identify and evaluate relevant workplace and work-related risks
- Be able to identify and implement appropriate risk control measures
- Identify the relevant legislation, guidance and sources of advice for H&S
- Learn how to set performance standards for Health & Safety and understand how to ensure competencies
- Understand how to develop and implement active monitoring systems, recording and analysing results
- Be able to play an active part in incident reporting and investigation
- Learn how to play an active role in developing and implementing effective health & safety management system

Duration 3 Days

Modules

- Introducing managing safely
- Assessing risk
- Controlling risk
- Understanding H&S responsibilities
- Understanding hazards
- Investigating incidents
- Measuring performance
- What all this means in reality – where do we go from here?
