

# PUWER Risk Assessment

## Description

The Provision and Use of Work Equipment (PUWER) risk assessment course is created to provide workers and managers, in all sectors, with the practical knowledge to be able to carry out work equipment risk assessments for a wide range of safety risks.

This PUWER Risk Assessment course, delivered by experienced health & safety professionals, gives time for in-course practical sessions. During the course there is also time to explore the in-house systems and processes.

The course content can be tailored to meet your specific local requirements.

## Aims

Delegates will be able to carry out high quality work equipment risk assessments

## Objectives

Delegates will:

- Understand the legal requirements relating to work equipment
- Understand the theory behind risk assessment
- Be able to identify specific hazards associated with respective pieces of work equipment
- Know how to record the findings
- Know how to develop risk control solutions for work equipment
- Understand basic audit trail considerations
- Be able to recognise when specialist help may be required

**Duration**     2 Days

## Modules

- Background
- Health and safety law
- PUWER and other relevant regulations
- Principles of risk assessment
- Hazard identification
- Risk controls
- Quality assurance
